IT FOCUS

. . . scans the published information

. . . selects the significant facts and opinions

. . . and presents time-saving summaries for the busy executive.

IT FOCUS covers all aspects of IT:

. . . hardware, such as micros, word processors and local networks

. . . communication systems, e.g. tele-conferencing, viewdata and electronic publishing

. . . applications: to business, the professions, industry, education, health care, etc.

COMPUTER AND CONTROL ABSTRACTS

A Complete information Service in Computer Science and Control Engineering

Coverage

Over 40,000 references are included each year. These are selected by scanning over 3,000 journals and the proceedings of over 1,000 conferences.
In addition coverage is given of books, reports and dissertations.

What Information is Included?

Each reference in CCA includes the following information:
Title of paper
All authors' names and affiliation of first author
Source of paper (eg name of journal, volume and issue number, page numbers and date of publication)
100-150 word abstract.

Ease of use

Careful classifying and indexing of entries puts information at your fingertips. References are classified under 250 headings, allowing you to go straight to the information of most interest to you. (A summary of the classification appears in every issue).
These six separate indexes are included in each issue:
Subject guide
Author index
Bibliography index
Book index
Conference index
Corporate author index
The above indexes are cumulated at six-monthly intervals. The author and subject indexes are also cumulated at four-yearly intervals*.

CUMULATIVE INDEXES

Cumulative indexes are available for *Physics Abstracts*, *Electrical & Electronics Abstracts* and *Computer & Control Abstracts*, for both authors and subjects. These cumulations generally cover a period of four years, with the exception of *Computer & Control Abstracts* where the initial volume covered the period 1966–68. The table below shows the prices and periods for the two types of cumulative index.

	PHYSICS ABSTRACTS		ELECTRICAL & ELECTRONICS ABSTRACTS		COMPUTER & CONTROL ABSTRACTS

OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.) This is a service individually tailored to the requirements and interests of the engineer or research worker. Details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database. Information is dispatched weekly on 150 mm × 100 mm (6″ × 4″) cards.

TOPICS

This is an SDI service based on standard profiles. There are over 90 subjects covering high-activity areas of research and devlopment. This is an inexpensive card service designed to alert engineers and researchers to the availability of literature within their subject area.

MAGNETIC TAPES

Tapes containing all the information included in the INSPEC publications are issued twice monthly. They enable the larger research and development organisations to produce their own internal information and current-awareness services.
